## Double Coverage When You Need It Most

No matter which plan you choose, you'll enjoy greater protection with our **double coverage** benefit.

In the event that death, TPD, or any of the 36 Critical Illnesses<sup>†</sup> occurs between **policy year 11 to age 61**, you will receive Current Sum Assured that is **equivalent to double the Initial Sum Assured (ISA)**. This means that you and your loved ones will be protected from financial hardship during a critical phase of your life.

To protect you before this benefit comes into effect, the Current Sum Assured will increase annually by 10% of the ISA from policy year 1 to policy year 10. After age 61, the Current Sum Assured returns to 100%.

<sup>†</sup> Selected plans only.

The premiums that you pay contribute to both the savings and protection elements of the product, e.g. death benefits. If you are looking for financial products with savings element, you may wish to compare annualised returns of your policy with the effective returns of other investment alternatives.

\* Annualised return is the estimated average annual return on the survival/savings benefits that you will receive over the period of the policy until its maturity with respect to the premium that you had paid.

### In the event that an accidental death occurs in an elevator car, public conveyance or as consequence of burning of public building, the total benefit payable will be  $RM111,900 \times 200\% \times (100\% + 600\%) = RM1,566,600$ .
